How do I add a domain to my account?

If the new domain you are planning to add to your account is already registered with another registrar and you wish to point it to your In2Net VPS Hosting account:

1. Log into the Account Control Panel : <https://pbas1.in2net.net/cp/>
2. Click on the System tab.
3. Select All My Domains.
4. Click on the Add Domain button.
5. Select the Use an existing domain registered elsewhere radio. Enter the domain name you wish to use on your VPS Hosting account and check the "Host domain in In2net Network Inc. DNS" option.
6. Click on the Save button when you are ready.

Note: You will need to make the necessary DNS changes to point your domain to your In2Net VPS Hosting account.
