How do I check my account traffic usage?

You can view traffic usage for your server on the side panel of the Account Admin Control Panel.

Traffic usage is calculated from the beginning of month.

1. Click on the Resources Usage. The Resource Usage page will open.
2. Click on the Traffic Statistics to to view graphical and tabular representations of your system's traffic usage.
3. You can also use the drop down menus on the bottom of the screen to query traffic usage within a specific range of time.
