

## **In2net Knowledgebase**

### **How can I restore a directory using a backup stored on my computer?**

To restore a directory from a backup stored on your computer:

1. Click on the System tab.
2. Select Backup and Restore.
3. Click on the Client-Side Backup and Restore tab.
4. Select Restore a directory from a backup stored on your computer.
5. Use the Browse button to locate the backup file stored on your computer.
6. Click on the Restore button to complete the process.
7. You will see the restore confirmation message on the screen.
