How do I change the password of my Parallels Power Panel?

You can change the password via the Change Password function in your Parallels Power Panel.

1. Login to your Parallels Power Panel.
2. Click on the Change Password link.
3. Enter a new password.
4. When you are ready, click on the Change button.

Note: This password change applies to the root login. Thus, the new password will be used for logging into your Parallels Power Panel as well as your Virtuozzo Plesk Panel. This password change does not affect the login password of your Account Administration Control Panel.

** If you wish you change the password of your Account Administration Control Panel, you will need to do so via the Account Administration Control Panel. (click here for instructions)
