How do I change the password of my Account Administration Control Panel?

To change the password of your Account Administration Control Panel:

1. Login to your Account Administration Control Panel.
2. Click the My Account tab.
3. Select Personal Settings.
4. Click on the Edit button.
5. Enter the new password. When you are ready, click on the Update button.

Note: This password change applies to Account Administration Control Panel only. The new password does not affect the login password of your Parallels Power Panel or the Virtuozzo Plesk Panel.

** If you wish you change the password of your Parallels Power Panel or your Virtuozzo Plesk Pane, please follow the instructions here.
