Where do I upload my files?

- Once you have created a Plesk account and have assigned domain and hosting services, you will be able to publish your files via FTP.

See "Now that my VPS Container is active, what's next?" for more information.

1. Start your FTP program.

2. Connect to your account using the login information of the Plesk account you're publishing files to.

3. Once you're connected:

HTML, PHP and image files goes into the httpdocs directory
CGI files goes into the cgi-bin directory
