In2net Knowledgebase

Deleting a backup policy

Deleting a data retention policy will permanently remove the Policy and all its historical task information.
Undoing this operation is not possible.
To remove a policy, select "Policy" from the main menu.
In the Policy list, find the policy you need to remove, and click on the "Delete" icon as follows.
A confirmation message will appear. If you would like to proceed, click [DELETE] button to complete your action.
