Accessing your recovery points

To access your recovery points via Backup manager interface,

1. Click on "Recovery Points" in the main menu
2. On the right side of the screen show the Recovery Point List. First select a Server(1) from the Server dropdown box then select a Disk Safe(2) from Disk Safe dropdown box. A list of recovery points will appear. The bottom of the screen shows the recovery point detail when a recovery point is clicked on.
